Personal statement

In the beginning of 2014 I moved by myself to London, wanting to know a bit more what life had to offer before I decided where to start my studies. It was a wonderful 7 months where I learned much about life, but I could hear the web design calling for me and I found Hyper Island, a school that seems to be everything that I'm looking for, innovative, modern and cool. If I got accepted I think would fit right in and contribute much to the school.

Key Skills

- Proficiency in all areas of Adobe programs, including Photoshop, InDesign and Illustrator
- Proficiency in developing websites with HTML, CSS and WordPress, and some JavaScript
- Fluent in Swedish and English

Work Experience

Barista part-time, Starbucks Sweden, Stockholm
